280 Sites + 8 Trails in 65 Counties = Great Alabama Birding

Over 15 years in the making, the system of eight trails highlights the best public locations available to watch birds year-round. Interest in wildlife observation continues to grow, and more and more people want to explore our amazing biodiversity, which makes us second only to Florida in the Eastern U.S. in total number of species of plants and animals. The Birding Trails project provides a major attraction for nature-loving tourists, while offering exciting birding opportunities for Alabama’s school groups, families, and seasoned birders.

The eight Alabama Birding Trails unify existing and potential birding sites into a series of cohesive trails and loops that are collectively marketed as part of a state-wide system. Many of the sites along the various trails are already being used by thousands of birders and other visitors annually.

The University of Alabama Center for Economic Development (UACED) is providing the leadership role of facilitation and project scope; The Alabama Department of Conservation and Natural Resources is providing their depth of knowledge relative to wildlife habitat, birding and previous birding trails experience; The Birmingham Audubon Society has provided experience that only deeply knowledgeable birders could. The Alabama Tourism Department and the Alabama Association of RC&D Councils and UACED have provided funding for the project; Chambers of Commerce across the state have taken great pride in the project, as have our Federal partners, the U.S. Army Corps of Engineers, National Forest Service and others.

Economic Impact of Alabama Birding Trails
$734 million in state expenditures on wildlife watching by residents
$813 million total expenditures on wildlife watching by residents

Economic Impact of Birding Nationally
46.7 million bird-observers nationwide
$17.27 million trip-related expenditures nationwide

*Source U.S. Fish and Wildlife 2011 National Survey of Fishing, Hunting, and Wildlife-Associated Recreation

The South in general has substantially more interest in birding than the rest of the country with 34% overall interest, followed by the Midwest at 24%.

The mission of the Nongame Wildlife Program is to manage, protect, and enhance the populations of nongame wildlife which make Alabama so unique. Nongame wildlife are those species that are not legally hunted, which make up more than 95% of the native species that Alabama has to offer, making our mission a formidable task to handle.

Soaring Bald Eagles share the rolling terrain with a variety of hawks and owls. Colorful warblers and other migrating songbirds pass through each spring and fall, many staying to nest during the summer. Waterfowl are plentiful on our lakes and ponds each winter, and wading herons and egrets can be found year-round.

With Alabama’s highest mountain and the deepest gorge east of the Mississippi, the Appalachian Highlands Birding Trail is noted for its scenic beauty.

Rich hardwood forests, abundant rivers and lakes, lush meadows framed by steep mountain ridges—you’ll find them all here. And along the way, you’ll find some amazing birding, as well!

The mission of the Nongame Wildlife Program is to manage, protect, and enhance the populations of nongame wildlife which make Alabama so unique. Nongame wildlife are those species that are not legally hunted, which make up more than 95% of the native species that Alabama has to offer, making our mission a formidable task to handle.

Founded in 1987, The University of Alabama Center for Economic Development (UACED) serves as a gateway to technical assistance resources at The University of Alabama. Through the utilization of professional staff and customized project teams, UACED assists communities, agencies and organizations to take an “asset based” planning approach to economic development opportunities.

Founded in 1946, Birmingham Audubon is Alabama’s leading non-profit organization engaging people in the enjoyment and conservation of birds, their habitats, and the natural world. A certified chapter of the National Audubon Society serving central Alabama with projects statewide.
